

Vegetation Marking Compound

**For local government, councils,
corporate operators and contractors**

The Product

Active constituent: DIRECT RED 2B-Y LIQUID

Herbi Red is a unique compound used for marking vegetation and areas when performing activities such as the spreading of liquid or granular fertilisers or applying various soil and grass treatments.

Unlike Rhodamine based products, Herbi Red leaves minimal staining of operators and their equipment. This makes Herbi Red ideal for use by contractors, local government and industry operators who are seeking a marking compound which has low impact on the environment and application personnel.

Aquatic situations

Herbi Red is non toxic or harmful to aquatic organisms.

Storage and handling

There are no specific requirements for storage and handling of Herbi Red. It is considered non hazardous under the code for transport of dangerous goods. It is non-flammable and noncorrosive. It is available in a 5 litre plastic drum.

How do you use Herbi Red?

Apply at a rate of 100ml per 100L. Use at a higher rate where more persistent marking is required.

Benefits of using Herbi Red

- Low OH&S issue for users.
- Does not contain Rhodamine
- Less long term staining of equipment.
- Mixes easily with water based solutions

Always read the entire label prior to use.
