

# Macrosol ATS

Total Nitrogen (N) content: 160 g/L, Total Sulphur (S) content: 340 g/L.

A high analysis liquid sulphur containing nitrogen, highly soluble and readily absorbed by plants.

## DIRECTIONS FOR USE

- Product should be used during ideal growing conditions to ensure effective uptake. Avoid extreme weather conditions such as heat and frost events. Spraying in the early morning or late afternoon can assist in minimising risk of rapid drying on the leaf due to evaporation. Where local experience of successful use is not available, we recommend a small scale jar test and test application prior to wide spread use. If any issues are observed do not continue with the application.
- It is recommended to add product to the tank mix after all other products have been mixed well in the tank, including most of the water.
- Do not apply by foliar application to stone fruit.
- Do not apply by foliar application to flowers or fruit of any crop.

## COMPATIBILITY

Compatible with most common fertilisers and crop protection products. It is recommended to perform a jar test before mixing. Do not use with amine based products. Do not apply this product with copper fungicides by foliar application on all crops.

## FIRST AID

If poisoning occurs, contact a doctor or Poisons Information Centre. Phone Australia 131 126.

## SAFETY DATA SHEET

For further information, refer to the Safety Data Sheet (SDS) which is available from the supplier or from our web site, [www.sipcam.com.au](http://www.sipcam.com.au)

CROPS	RATE	COMMENTS
<b>BROADACRE</b>	<b>Foliar</b> 4 – 6 L/ha <b>Starter fertiliser</b> 10 – 40 L/ha	Apply at 4–6 leaf stage before stem elongation and before flowering. Avoid application if temperature is above 22 degrees or relative humidity is below 30%. Phytotoxicity is a risk in adverse conditions and at high rates. For furrow injection, the product must be 5 cm to the side and below the seed.
<b>ROW CROPS AND VEGETABLES</b>	<b>Starter fertiliser</b> 10 – 30 L/ha <b>Surface band</b> 20 – 50 L/ha <b>Drip Irrigation</b> 10 – 30 L/ha	For furrow injection the product must be 5 cm to the side and below the seed. Apply more then 30cm from the plant Apply towards the end of a full irrigation. Repeat as required, typically every 7 to 10 days from 3rd leaf stage
<b>TREES AND VINES</b>	<b>Young trees</b> 20 – 40 L/ha <b>Mature trees</b> 40 – 60 L/ha	Applied when roots are actively growing or as required throughout the season.

**WARNING:** This product has a pH of approximately 7.5 and is not compatible with acidic (low pH) products. When acidified sulphur gases can be produced, it is recommended to not reduce the pH below 6.0. Avoid foliar sprays on sensitive crops, such as apples and celery, as phytotoxicity may occur. As per the comments in the rate section, do not apply close to seeds in furrow as reduced germination may occur, particularly in dry sowing conditions.

## WARNING STATEMENTS

Do not swallow. The spray from this product may act as an irritant. Avoid inhalation and contact with the eyes and skin.
